

SAP Utilities Forum 2015

Mobile time confirmation with SAP Work Manager

Münster, 11.11.2015

Brief introduction of EWR GmbH

Energy Provider and Water Supplier in Remscheid:

- Shareholder: Stadtwerke Remscheid GmbH,
 RWE Deutschland AG and Thüga AG
- EWR GmbH is part of Stadtwerke Remscheid-Group, beside local public transportation, parking and leisure services
- Sectors: electricity, gas, water, energy services, street lighting
- Revenues: approx. € 155 Mil. in 2014
- Supplied residents: approx. 111,000

Basic strategic approaches at EWR for construction and maintenance

- 1. Implementation of software to support maintenance processes.
 - → Reduction of media breaks, improvement of data quality etc.
 - 2. Expand Workforce Management only as far as mandatory.
 - → No maximum expansion with high administrative expenses
 - 3. Increase of mobile IT system usage for technicians.
 - → Increase of efficiency and effectiveness on-site
- 4. Adoption of new technologies supports development of the organisation.

 → Increase of innovation
 - 5. Future challenges → Increase of flexibility

Motivations for mobile maintenance

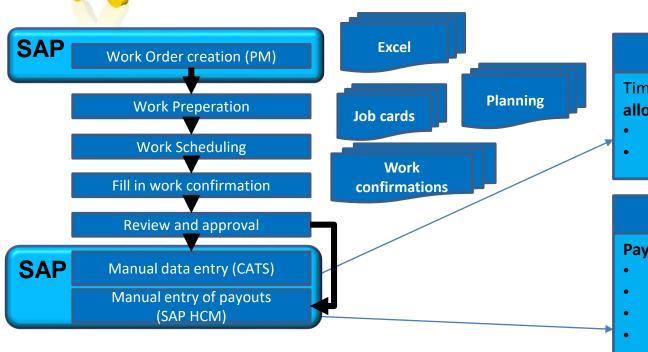

- High resource effort to enter activity reports manually
- Manual entry of times into different systems
- Error-prone multi-stage data entry process
- Familiarization of technicans with mobile IT systems
- Development of ideas for future mobile processes and applications

Starting situation at power grids

CATS

Time recording for **internal cost** allocation:

- Order-related working hours
- Working hours from on-call duty

SAP HCM

Payment relevant time tracking:

- Working hours from on-call-duty
- Approved overtime
- Unplanned overtime hours
- Complications
- Unplanned absences

Project Profile

Project Overview

- Implementation partner: Evora IT Solutions
- Mobile solution: SAP Work Manager 6.2
- Mobile hardware: iPad Mini
- Development sites: Germany & India

Project Schedule

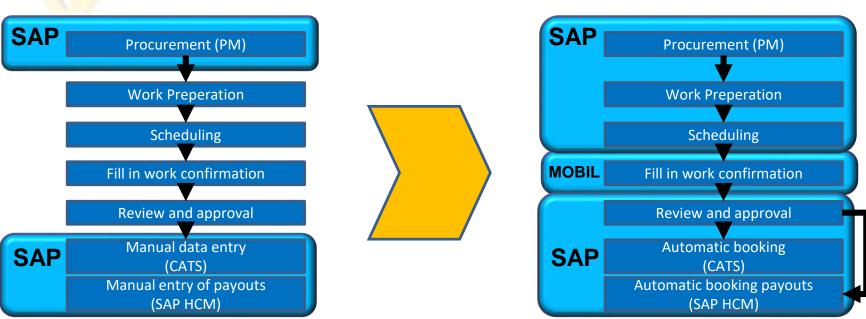

- Specification phase: July August 2014
- Project start: Mid February 2015
- Implementation: March July 2015
- Production start-up of pilots: October 2015
- Rollout for all technicians: Currently in progress

Target process

Continuous IT process without media breaks

Mobile work at EWR with SAP Work Manager

0

Experiences (I/III)

Project Preperation

- The development of scope should be done with special attention in order to define what is really necessary.
- Project size should be manageable to bring in the project's success, before acceptance decreases.
- Choice of service provider and of product must fit to project's scope.
- Even with this easy understandable task, it is required to link and engage many organizational units of the company.

Project Execution

- During the project various topics emerged to improve processes in SAP.
 That took additional energy but payed off with additional positive effects.
- Early and intensive involvement of works council established a basis of trust and led ultimately to a good works agreement.
- Similarly intensive inclusion of affected employees masters, head-handcrafter and technician.
- Choice of hardware by the affected is a substantial generator of success in terms of acceptance.

Experiences (III/III)

Project Completion

- At launch of SAP processes staged and comprehensive training courses are required – but less than for the mobile application.
- Within a shorttime, employees were able to handle the solution because it is that simple.

Thank you very much for your attention!
